

Legend:

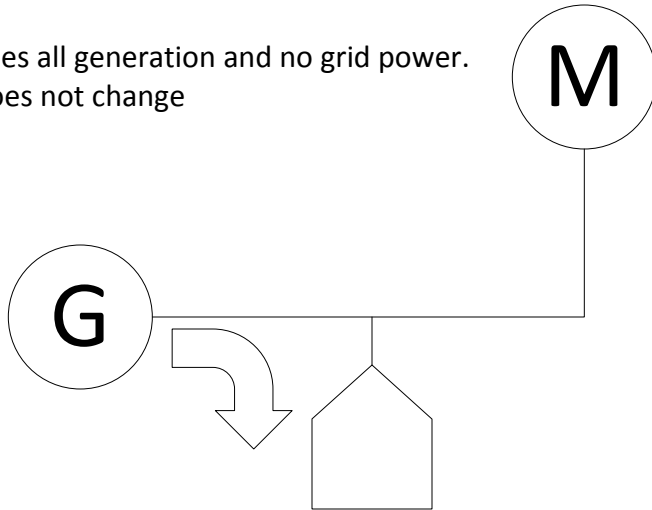

G: Generator

M: Utility Meter

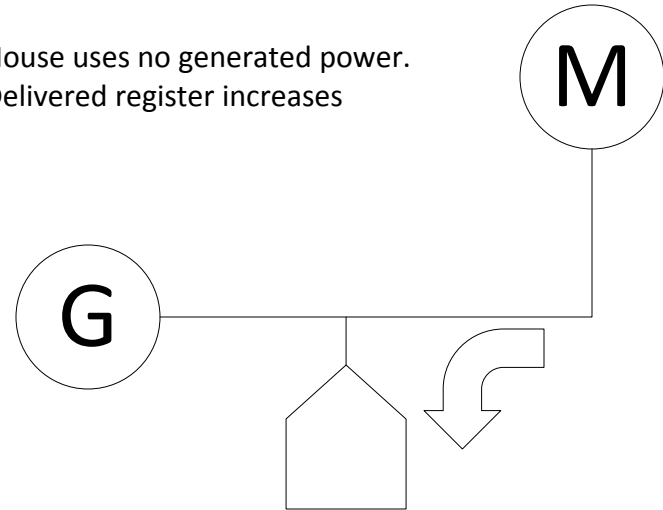

Delivered = Power from HEA = POS value on Meter

Received = Power from Generator = NEG value on Meter

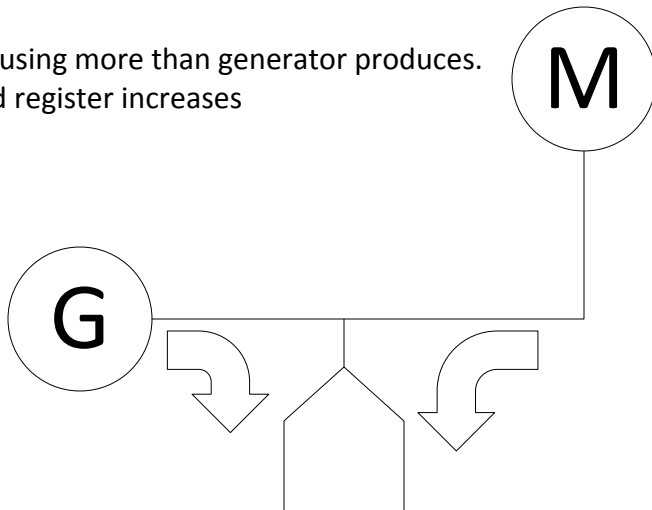

- House uses all generation and no grid power.
- Meter does not change

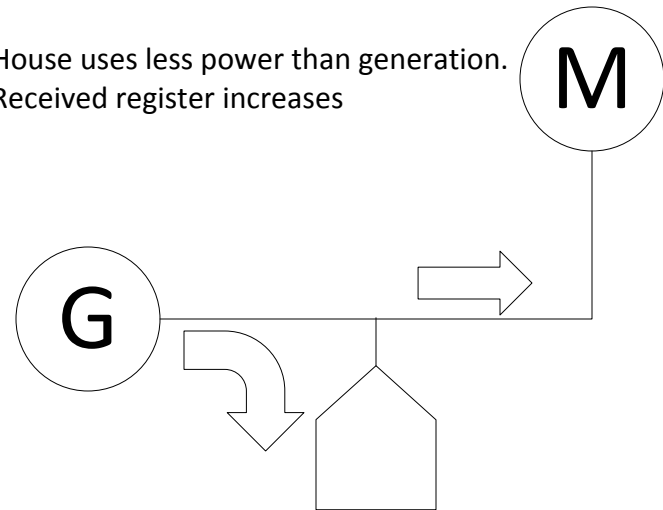

- House uses no generated power.
- Delivered register increases

- House is using more than generator produces.
- Delivered register increases

- House uses less power than generation.
- Received register increases

Your monthly bill = the net (subtraction) of Delivered - Received
